Control Your Records. Control Your Fleet.

Managing records and maintenance history across dozens of aircraft introduces massive operational friction. When data is siloed across paper logbooks, legacy software, and third-party vendors, it leads to costly administrative blind spots and makes it incredibly difficult to ensure consistency in work and documentation.

It's time to replace paper logbooks, disconnected maintenance data, and get access to real-time fleet visibility.

- ✓ Standardize records across your fleet
- ✓ Gain real-time visibility for every aircraft
- ✓ Eliminate compliance risk with automated AD and SB tracking
- ✓ Align flight usage with predictive maintenance planning
- ✓ Strengthen asset value with complete, audit-ready documentation
- ✓ Give teams immediate access to aircraft data

Built for Predictability. Designed for Scale.

Centralized Fleet Control

- 1 Consolidate your regulatory, safety, and maintenance environments into a single source of truth. Standardize your records across dozens of aircraft so your fleet is always audit-ready and compliant.

Proactive Maintenance Planning

- 2 Maximize your hangar throughput. Forecast life-limited parts, inspection intervals, and mandatory compliance deadlines before they become critical. By predicting parts demand and labor needs early, you eliminate administrative blind spots and prevent AOG events.

Real-Time Intelligence

- 3 Empower your maintenance and dispatchers with instant clarity. See exactly which aircraft are airworthy and which require attention the moment you log in. When everyone operates from the same verified data, you make faster, safer decisions.

spent researching records
not on maintenance

Why Choose Crewchief?

✓ Eliminate Operational Friction

Replace fragmented paper logbooks and siloed spreadsheets with a unified platform, ensuring your dispatchers, mechanics, and outside vendors are always operating from the same source.

✓ Immediate Clarity

No heavy IT burdens or months-long learning curves. We digitize your existing records so your team can instantly search decades of history, drastically reducing the time spent on bookwork and keeping your fleet audit-ready.

✓ Protect Asset Value

Protect your fleet from the liability of lost or damaged paper records. Crewchief secures your data in a centralized digital profile, preserving compliance, protecting asset value, and ensuring operational confidence throughout the aircraft's life.

Scale Your Fleet with Confidence

“

We know what the planes are going to need, and when they're going to need it. It balances our workflow, so we don't have wild swings between dead time and being overly busy. We know ahead of time when these planes are going to come in for maintenance and that helps us out a lot.

-Gordon Mills, Alpine Aviation
