# Modern Aircraft Deserve Modern Data

You build state-of-the-art aircraft with advanced avionics, yet the moment they leave your factory, their history disappears into a paper binder. This disconnect creates a black hole in your data and the owner experience.

It's time to replace paper logbooks, connect maintenance and usage data, and get access to real-time fleet visibility.

- ✓ Provide an accurate, real-time digital ecosystem for your service centers
- ✓ Clearly view warranty, compliance, and usage across your entire fleet
- ✓ Automatic tracking of ADs and SBs ensure airworthiness
- ✓ Connect flight usage data to maintenance intelligence
- ✓ Protect aircraft value through lifetime record integrity
- ✓ Empower technical support with instant aircraft insights

## Connected Lifecycle Intelligence

Extend your relationship with the customer far beyond the delivery.

### Digital From Day 1

- 1 Eliminate paper logbooks from day one. We enable you to deliver a digital profile of every aircraft, with manufacturing records, equipment lists, and airworthiness certificates pre-populated.

### Connected Service Network

- 2 Close the loop between your factory and the field. Your authorized service network operates on the same data, utilizing your specific inspection protocols pushed directly to the platform to ensure maintenance consistency and warranty compliance across the globe.

### Telemetry Insights

- 3 For Garmin-equipped fleets and other flight data integrated devices, our platform ingests flight data to help you plan supply chain logistics and provide proactive support based on actual usage.

Standardize maintenance across your network, ensuring service centers perform inspections as intended.

Push updated inspection protocols directly to service centers via the cloud.

Service centers log discrepancies and sign off on work, instantly updating the owner's logbook and fleet data.

## Why OEMs Choose Crewchief?

Extend your brand's intelligence. We turn daily flight operations into a permanent feedback loop, giving you the insights needed to predict parts demand, optimize maintenance intervals, and ensure every aircraft operates exactly as your engineers intended.

### ✓ **Connected Ownership Experience**

By integrating your authorized service centers with the owner's digital logbook, you create a seamless ecosystem where data flows automatically. This connectivity drives owners back to your certified network for service.

### ✓ **Value Retention and Brand Protection**

A documented aircraft is a valuable aircraft. By ensuring every tail number in your fleet possesses a comprehensive, searchable history of every flight and service event, you protect the secondary market value of your brand. This builds buyer confidence, accelerates resale transactions, and reinforces your reputation for quality.

# Elevate Your Aircraft Beyond Delivery

“

The integration of Crewchief Systems into our helicopters represents a shift in how we support owners and operators. We aren't just delivering reliable aircraft; we are providing a digital nervous system that supports the safety, efficiency and ease of maintenance for the life of the helicopter. By supporting the transition away from paper logbooks, we are giving our customers the real-time intelligence they need to stay ahead of the maintenance curve and prolong the life of their helicopter.

**-David Smith, President and CEO,  
Robinson Helicopter Company**
